

Shantaram S Divgi

Mangalore, India | sarveshdivgi@gmail.com | +91 821 7200691 | github.com/RamDivgi | linkedin.com/in/shantaram-divgi

Professional Summary

AI/ML undergraduate with hands-on experience building RAG pipelines, computer vision systems, and full-stack applications. Proficient in Python, TensorFlow, PyTorch, and LangChain. Strong foundation in OOP, DSA, REST APIs, and Agile SDLC. Targeting Software Engineering, AI/ML, and Data Analytics internships at product-driven companies.

Technical Skills

- **Languages:** Python, Java, SQL, JavaScript, C, C++
- **AI/ML:** TensorFlow, PyTorch, Scikit-Learn, LangChain, RAG, FAISS, LLMs, Prompt Engineering, NLP, Computer Vision, Generative AI, OpenCV
- **Software Engineering:** DSA, OOP, REST APIs, Git, GitHub, Agile, SDLC, Version Control, API Integration, Debugging, Unit Testing
- **Databases & Tools:** Firebase, SQL, Docker, Flask, Jupyter, Power BI, Tableau, Edge Impulse, ESP32-CAM, HTML, CSS
- **Soft Skills:** Problem Solving, Team Collaboration, Analytical Thinking, Adaptability, Communication, Time Management

Experience

InAmigos Foundation — Web Development Intern

May 2026 – Jun 2026 · Remote

- Engineered a responsive animated awareness webpage with scroll-reveal effects across 6 content sections covering 4 NGO programmes, boosting outreach engagement.
- Built a reusable photo gallery displaying 30+ images across 5 sections; delivered a 5-feature stakeholder presentation used for LinkedIn promotion and internal review.

JPMorgan Chase & Co. — Software Engineering Job Simulation

March 2026 · Virtual

- Completed industry-grade simulation solving coding exercises and debugging modules under sprint constraints, applying OOP, modular design, and unit testing practices.

Projects

MindLink — RAG PDF Chatbot

Python, Flask, FAISS, Cohere, LangChain | [GitHub](#)

- Built a Retrieval-Augmented Generation chatbot enabling natural-language Q&A over multiple PDFs using FAISS vector search and Cohere LLM embeddings via a Flask REST API backend.
- Optimised retrieval latency by chunking documents into 512-token segments and caching FAISS indices, achieving sub-second query responses across multi-document contexts.

Smart Traffic Signal System for Emergency Vehicles

Python, ESP32-CAM, Edge Impulse, Firebase | [GitHub](#)

- Deployed a computer vision pipeline on ESP32-CAM with an Edge Impulse-trained model achieving 90%+ ambulance detection accuracy in real time.
- Integrated Firebase Realtime DB for sub-second sync between detection hardware and adaptive signal-control logic across multiple intersections.

Emergency Vehicle Router Web Application

JavaScript, Leaflet, OpenStreetMap, Firebase | [GitHub](#)

- Built a full-stack routing app integrating 3 map services with dynamic roadblock-avoidance algorithms for optimised real-time emergency vehicle navigation.
- Designed a live dispatcher dashboard visualising routes and traffic data on an interactive map, reducing manual route-planning overhead.

Education

B.E. in Artificial Intelligence and Machine Learning

Expected Jul 2027

Canara Engineering College

CGPA: 7.9

Pre-University (PCMB)

Mar 2023

Dr. A V Baliga College of Arts and Science

90.33%

Certifications

Generative AI and ChatGPT — GeeksforGeeks (Mar 2026) | Software Engineering Job Simulation — JPMorgan Chase & Co. (Mar 2026)

Achievements & Activities

- Developed and demonstrated a functional AI prototype at HACKOTASVA'26, a 24-hour hackathon by SMVITM Bantakal, collaborating with a multidisciplinary team under tight deadlines.
- Active GitHub contributor with projects spanning RAG, Computer Vision, and Full-Stack development.
